The Official Newsletter of Global PCCS

Key Highlights

REACH Candidate List Update (SVHC) May 2019

The following file contains a list of substances which will be **marked SVHC in IMDS on 17th May 2019**. These are currently flagged only as D on GADSL as they belong to the 'Nonylphenol ethoxylates, all members' GADSL group. This is in response to information from ECHA that considers isomeric mixtures of nonylphenol ethoxylates as belonging to the '4-Nonylphenol, branched and linear, ethoxylated' REACH Candidate List entry. This is because commercially manufactured nonylphenol ethoxylates are normally substances predominantly consisting of C9 alkyl substituents in position 4 (para-) of the phenol ring. The '4-Nonylphenol, branched and linear, ethoxylated' REACH Candidate List entry is included in entry 43 of the REACH Authorisation list and therefore these substance will also be added to the Annex XIV substance group in IMDS.
