Key Highlights

Will there be a "RoHS 4"??? are there additional substances that will be restricted in the future?

Maybe/probably. There are discussions (called RoHS Pack 15) taking place for the possible amendment and inclusion of seven new substances. The seven additional substances being assessed are: Beryllium, Cobalt (dichloride and sulphate), Diantimony trioxide, Indium phosphide, Medium-Chain Chlorinated Paraffins (MCCPs), Nickel (sulphate and sulfamate), and Tetrabromobisphenol A (TBBP-A). Biocidal Products Committee concludes on Union authorisations for disinfectants and pest control

DBNPA or 2,2-dibromo-3-nitrilopropionamide - cannot be approved for product type 4 unless one of the following derogations foreseen in the Biocidal Products Regulation can be applied:

- the risk of exposure to the environment, human and animal health is proven to be negligible; or
- there is evidence that the active substance is essential to prevent or control a serious danger to the environment, human or animal health; or
- the non-approval is shown to have a negative impact on society compared to the risks arising from the use of the substance. [Click for more info...](#)
