SCOPE 2
SCOPE 1

SOFTWARE SERVICES

Our software services help companies to achieve their corporate sustainability goals by structuring and implementing technical and management strategies that to cut energy costs and greenhouse gas emissions significantly and sustain those savings over time.

"**ENSYS**" is an innovative software developed by Global PCCS based on ISO 50001 Energy Management Systems (EnMS) framework. ENSYS is an Energy Management Review System which unlike other energy monitoring and energy data reporting systems, also deals with all the opportunities, plans, actions, communication and documents needed for ISO 50001 in a workflow-based solution. It has helped our customers to save 12%-15% of their energy costs & directly causing an impact on the environment by reducing CO_2 emission.

"**GHG Metrix**" is a CDP reporting tool which encourages companies to assess their environmental impact based on four levels - Leadership, Management, Awareness & Disclosure; hence showcase their progress towards environmental stewardship.

ENSYS

- $ Energy & Cost Savings
- Cloud based or On-premises deployment
- Auditing & Reporting with Trend Charts
- Integration with other metering systems
- Document & Workflow Management
- Remote & Live Monitoring
- CDP Reporting
